

Worksheets Practice

Gina noticed that she was quite erratic in the number of worksheets she practiced. She decided to observe in 2016 and mark it down. Here are her findings:

1. Which month recorded the least number of worksheets Gina did?
2. Which month recorded the most number of worksheets Gina did and how many did she do?
3. Which month recorded the average number of worksheets she did?
4. In which month do you think Gina would have been the most confident about her learning and why?
