

### Real Life World Problems

Capacity measurement conversion:

1. Mr. Smith was filling up a 5 l container with water. He had a small 500 ml jug. How many times would he have to fill the jug to totally fill the container?
2. Mrs. Smith poured 900 ml out of a 1 l milk container. How much was left?
3. How many 100 ml glasses can be filled from a 1 l jug?
4. Mr. Anderson was filling up a 2 l container with water. He had a small 200 ml jug. How many times would he have to fill the jug to totally fill the container?
5. Mrs. Anderson poured 500 ml out of a 1 l milk container. How much was left?
6. How many 200 ml glasses can be filled from a 1 l jug?
