# Addition to make 100

Example: If you want to reach the number 100 from any 2 digit number how can you do quickly?
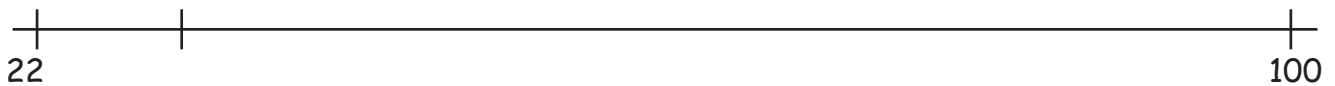

○ Add a number to reach the next 10, then add the number of tens you need.

+ 2   5 tens = 50

48   50   100

$48 + 2 = 50$ then adding 5 tens to it will give you 100.

Now use the above method, show how you arrived at number 100.

**12**

22   100

23

33   100

39

39   100

62

62   100

42

42   100
