

# Sharing Ratio

First sum up the two numbers that make the ratio. In this case it is **2** and **1** which is equal to **3**.

Divide the number that needs splitting in to a ratio by this sum.

Here  $24/3 = 8$

$$8 \times 2 = 16$$

$$8 \times 1 = 8$$

So when we share **24** in the ratio **2 : 1** the share of each number will be **16** and **8**.

a. Share 24 in the ratio 2:1. =

b. Share 14 in the ratio 2:5. =

c. Share 16 in the ratio 3:5. =

d. Share 18 in the ratio 2:4. =

e. Share 6 in the ratio 2:4. =

f. Share 12 in the ratio 1:3. =
